

FV Metall- und Materialphysik

Regensburg 2007

	Monday			Tuesday			Wednesday			Thursday			Friday			
	H16 (320)	H4 (200)	H6 (100)	H16 (320)	H4 (200)	H6 (100)	H16 (320)	H4 (200)	H6 (100)	H16 (320)	H4 (200)	H6 (100)	H16 (320)	H4 (200)	H6 (100)	
08:30	PV Louie			PV Lemke			PV Zabel			PV Finley			PV Norskov			
08:45																
09:00																
09:15	HV Lilleodden			HV Yip			PV Imamoglu			HV Kozubski			PV Joanny			
09:30																
09:45																
10:00	SYM Micro and nano mechanics	liquid and amorphous materials I	Interfaces I	SYM Micro and nano mechanics	Phase transitions I	Hydrogen in materials	Festsitzung			Intermetallic phases I	Phase transitions III	Diffusion I	HV Haaks			
10:15											Materials design I			Mechanical properties II		
10:30																
10:45																
11:00																
11:15																
11:30																
11:45																
12:00																
12:15																
12:30		liquid and amorphous materials II	Interfaces II		Phase transitions II	Electronic properties I				Intermetallic phases II	Nano structured materials III	Diffusion II				
12:45													Materials design I			
13:00													Mechanical properties III			
13:15																
13:30																
13:45																
14:00	HV Greer			HV Glatzel			HV Nierlich			HV Lendlein						
14:15																
14:30																
14:45	SYM Micro and nano mechanics	liquid and amorphous materials III	Interfaces III	Poster C			SYM Physics meets Industry	Nano structured materials I	Electronic properties II	SYM Bioinspired Materials continuation of SYBM	Nano structured materials IV	Diffusion III				
15:00																
15:15																
15:30																
15:45																
16:00																
16:15																
16:30																
16:45																
17:00			liquid and amorphous materials IV		Growth						Nano structured materials II	Electronic properties III		Nano structured materials V	Mechanical properties I	
17:15																
17:30																
17:45																
18:00	PV Paetzold			Annual meeting of the division metal and materials physics, H47												
18:15																
18:30																
18:45																
19:00																
19:15																
19:30																
19:45																
20:00																
20:15																
20:30																
20:45																
							Public evening talk			Poster SYM Bioinspired Materials near H16						

Thursday, H1, 9:30-12:15, SYBM together with BP, CPP, DS and DY
