With this years program, the working group young DPG (jDPG) wants to reach out to as many participants as possible. For participants at the end of their PhD, young postdoc and participants looking for new job opportunities, the jDPG and the working group on Industry and Business (AIW) are organizing a series of Lunch Talks (in German), taking place during the lunch breaks on Tuesday, Wednesday and Thursday. Within these talks physicists who already gained experience in working in the economy will present their field of work and will share their knowledge.

For those young participants who want to network with others or just want to explorer the nightlife of Aachen, the jDPG offers a pub crawl on Wednesday evening. Starting point will the restaurant Vielharmonie at 19:30.

Mittagsvorträge

AKjDPG/AIW 1.1	Di	13:00–13:30	H11	Kann man Karriere planen? Als Physiker in der Unternehmensberatung — ●ROLF LOSCHEK
