

Lunch Talk PSV IX Thu 13:00 HSZ/0004
The organic development and growth story of aSpect Systems GmbH — ●MARCUS VERHOEVEN — aSpect Systems GmbH

The talk will present the organic development and growth story of aSpect Systems GmbH, a Dresden-based technology company at the intersection of semiconductor engineering and applied physics. Starting from a small team dedicated to advancing semiconductor test and au-

tomation technologies, aSpect has continuously evolved by leveraging deep technical expertise in hardware, software, mechanics and optics to solve real-world industrial challenges. Today, the company supports development services, supply chain solutions, test and automation equipment for imaging, optoelectronics and semiconductor manufacturing, helping to bridge the gap between cutting-edge research and industrial application.
